

# M Series

# Wire Rope Hoist The MISIA lifting solutions.

With more than 35,000 units sold and 25 years experience, Misia has met the standards expected from a leading wire rope hoist manufacturer.

reliability and performance whilst remaining cost effective, are all complemented by our **impressive fem (ISO) ratings.**

Our range covers capacities from **800 kg to 40,000 kg SWL** and is supported by the following configurations: short headroom - standard headroom - foot mounted - articulated trolley (to negotiate radius) - double rail trolley (crab unit) including special gauges and inverted hoist option. Single or two speed on hoist and travel motions are available along with the option of 2 or 4 rope falls. Misia's versatility and reliability, even in the most aggressive environments, make it **the ideal hoist** for many applications including: steelworks - fabrication shops - foundries - galvanizing plants - paper works - dockyards and ports - glassworks etc.

A proven engineered design-dedicated to low maintenance costs, Misia's high level of

Version S2 with 2 rope falls

Version S4 with 4 rope falls

Hoist with supported double rail trolley.

Hoist with suspended double rail trolley.

Hoist with monorail, low headroom trolley.
